*PRODUCTIVITY*

Built for Performance. Our Productivity Portfolio  
Helps Contractors Get More Done, Faster.

# Getting the Most Out of Your Labor. More Important than Ever.

As a pro contractor, some things have always been a given: Your skill. Your hard work. Your commitment. But more and more, there are some other, more challenging givens: Tighter timelines. More demanding customers. Persistent labor shortages. It means a job that's never been easy has gotten a heck of a lot harder. It also means that, more than ever, your ability to get the most out of your labor is absolutely critical.

But here's some good news: you don't have to go it alone. In fact, Grabber Construction Products offers an entire suite of products geared towards helping you maximize your productivity.

**Thousands of Products.  
Countless Applications.  
One Purpose.**

What began more than 50 years ago with a single fastener has grown into a portfolio of more than 16,000 products ranging from professional-grade fasteners to state-of-the-art collated solutions to game-changing drywall fabrication systems. And while each is engineered to do a different job (and do it very, very well), they all share a common purpose: Helping you and your crews accomplish more each day, and to grow both your bottom line and your business as you go.

# **Our Products are an Investment. One with a Very Good Return.**

At Grabber, we take pride in offering a premium product. Are we a budget option? No. Are we a good value? Absolutely. After all, value is about more than what you pay for something. It's about what you get in return. And when you invest in Grabber products, you get a whole lot in return:

## **Quality Craftsmanship**

Our products are built to the highest standard, rigorously tested and rooted in decades of manufacturing expertise and supplier relationships.

## **Reliability**

Consistent. Dependable. Built to do the job right the first time, so you avoid callbacks, damaged tools, or worst of all, a damaged reputation.

### **Innovation**

The status quo isn't enough. Our innovation team works nonstop to deliver better ways to help you and your crews succeed.

### **Accountability**

When issues do arise, we don't pass the buck. We solve the problem, and, hopefully, gain your trust in the process.

### **Service**

Our expert GrabberPros—industry vets with an average of 13+ years in the business—are at the ready to be on your jobsite and at your service within 48 hours.

### **Greater Productivity**

It's what everything else you get from our products adds up to. More productive days. More profitable jobs. Repeat. Call it the Grabber Dividend.

## **The Proof is in the Products.**

At Grabber, helping contractors get more done with the labor they have is a passion bordering on obsession. An obsession we've channeled into a vast and diverse array of productivity-boosting products and solutions, just some of which you'll find on the following pages.

# First it Replaced Nails. Then it Became Irreplaceable.

Galvanized nails used to be the standard fastener for hanging drywall. Until the Grabber—our namesake screw—came along. Extra sharp threads allow you to drive faster. Tighter recesses result in fewer cam-outs. Extra high-grade steel means they hold better. It adds up to a level of performance that's unmatched in the industry. No wonder they're the best contractor's go-to for getting more done, day after day, job after job.

### **The Screw that Launched a Revolution.**

- Sharp threads drive faster
- Sharp points improve penetration
- Tighter recess, fewer cam-outs
- Infrequent screw head failure or shear off
- High grade steel holds better, lasts longer

# **Faster Driving. Better Holding. Game Changing.**

Framing and track. Joists. Prefab panels. Whatever you're installing, our steel framing screws are built for speed thanks to a super-sharp Vector Point™ that helps you drive up to 40% faster. They also hold better and last longer, so you don't just get the job done faster. You get it done right, with less rework, fewer callbacks and more profit.

**Where Velocity  
Meets Quality.**

- Super-Sharp Vector Point™ drives up to 40% faster
- #2 Phillips recess reduces wobble and strip out
- Under-head serrations lock tighter
- Modified truss head holds better

# **Less Effort. Less Waste. Fewer Headaches. And a Whole Lot of Bang for Your Buck.**

When it comes to fastening wood to wood, drops, cam-outs and spin-outs cost you time and money. Which makes UltraPro™ wood screws invaluable. Their extra-sharp threads drive faster and hold tighter, with less effort. Use them for practically any wood project, indoor or outdoor, to get more done, more efficiently and, best of all, more profitably.

## **The Total Package for Wood Framing Productivity.**

- No wobble or strip-out
- Drives faster
- Tighter seal
- No pre-drilling required
- No countersinking required
- Drives easily with one hand

# A Stronger Grip. So You Can Let the Torque Rip.

When it comes to equipping contractors with the tools for success, no detail is too small. Case in point, our patented Lox® Recess. Available on the entire UltraPro™ line, the Lox® Recess delivers superior bit grip and almost double the torque capacity. That means you can drive harder from almost any angle without worrying about cam-outs, reducing waste, making for more productive days. And more money in your pocket.

**Stronger Grip.**  
**Maximum Torque.**  
**Minimum Waste.**

- Eight points of contact for superior bit grip
- Nearly double the torque of four-point recesses
- Lox® bit included in every box of UltraPro fasteners

# Drywallers, Start Your Engines.

The SuperDrive® series of collated systems (including Series N7, 55, 75, 80 and 85) are examples of what can happen when you put the most advanced tools in the most skilled hands. Designed for a variety of drywall and subfloor applications, they convert your favorite drivers into auto-fastening tools in seconds, eliminating the need for hand feeding. So you can work lightning fast with fewer drops and more precision. That means you're able to make the most of your ample skills while finding a whole new gear of productivity.

**A Lean, Mean  
Drywalling Machine.**

- Faster, more precise driving
- Fewer drops
- Compact, lightweight
- Simple to use, easy to service

GRABBER  
**SuperDrive** *N7 Series*

## **For Metal to Metal. And Pedal to the Metal.**

The SuperDrive® Mach1™—the first collated system designed specifically for steel framing—allows you to work five times faster than bulk screws. That's not just fast, that's darn near supersonic. And by eliminating the repetitive motion of hand feeding, you're less likely to be slowed down by injury. You're also less likely to lose screws, saving you the time and cost of replacing them. It's the perfect combination of speed, performance and efficiency. And it'll put you on the fast track to peak productivity.

**Engineered for Speed.  
Make that Warp Speed.**

- Five times faster than bulk screws
- Works with Makita®, Milwaukee®, and DeWalt® impact drivers
- Ergonomic design reduces strain of repetitive motion
- No slip tip increases safety, reduces lost screws

GRABBER  
**SuperDrive** **MACH1**

# For Clean, Precise Corners, Out-of-the-Ordinary Shapes, and Off the Chart Productivity.

Manually cutting drywall to create corners, curves or intricate shapes has long been cumbersome and time consuming. Not anymore, thanks to PanelMax®. This innovative drywall fabrication system allows you to create even the most challenging details faster, more efficiently and more cost effectively. And designs you might never have attempted using drywall in the past, you can now knock out without skipping a beat.

**Cuts Drywall in All  
Shapes and Sizes.  
Sends Costs in  
One Direction: Down.**

- Cuts installation time
- Creates perfect corners and precision assemblies
- Delivers big cost savings:
  - 70% on wall construction
  - 60% on stencil cutouts
  - 80% on duct linings
  - 70% on ceiling construction
  - 55%-70% on columns
  - 55%-70% on 90 degree corners

**PANELMax**

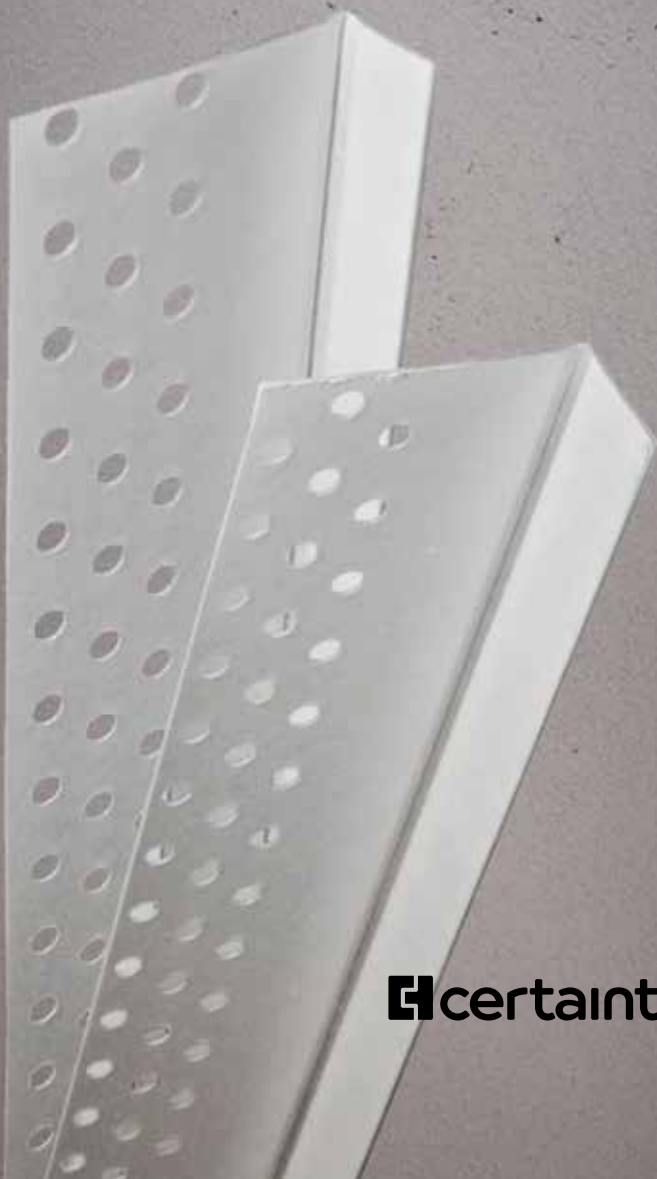

## **Corner with Confidence. Finish Strong.**

On any drywall job, you want to make the most of all the hard work you and your crew put in, from top to bottom. That includes the corners. That's why Grabber carries the No-Coat® corner system from CertainTeed®. Use it to create crisp, clean lines and perfect looking corners with ease. No blisters. No bubbles. No dents or cracks. Just what you need to put the finishing touches on a job well done, with fewer callbacks, greater productivity and higher profits.

### **The Products You Want in Your Corner.**

- CertainTeed® No-Coat Flexible Corner 325:
  - For short run-off angles
  - Straight, precise lines
  - Built-in flexible hinge forms to any corner angle
- CertainTeed® No-Coat Flexible Corner 450:
  - Extra-stiff profile for easy application
  - Wide flange covers large gaps and poor framing
  - Built-in flexible hinge forms to any corner angle

SAINT GOBAIN

# Watch Your Ceiling Installation Productivity Go Through the Roof.

Say goodbye to hazards and the inefficiency of cutting ceiling tiles with a square and utility knife. And say hello to RevealCut™ from Arrow, the all-in-one precision workstation for cutting ceiling tiles, available from Grabber. By eliminating manual cutting, you're able to complete ceiling installations in a fraction of the time, at a fraction of the cost and with minimal waste. The result is a level of output that'll put a smile on any contractor's face.

**Cuts Ceiling Tiles.**

**Slashes Labor Costs.**

- Cut labor costs by 80%
- 30-second cuts
- 72 configurations
- Clean, consistent cuts

# Evens Out Your Floors. Tidies Up Your Bottom Line.

Delivering materials on jobsites with uneven floors can be hazardous to your crew's safety. And your profitability. But you can avoid the mishaps that cost you time and money thanks to Combat Mat™, the first-of-its-kind floor reinforcer. It makes delivering materials faster, safer and easier. So you can get more done, with the reassurance that your crew, your materials and your bottom line are safe and sound.

**Risk Goes Down.  
Productivity  
Goes Up.**

- Creates even transitions to reduce tripping hazards and tipped carts
- Allows you to carry more materials with less waste
- Prevents damage to materials
- Designed for even weight distribution
- Durable, compact and easy to stack

**COMBAT MAT™**
