Application: Pan head screw used for cabinet assembly and installation. Type 17 point provides easy penetration and minimal expansion of material leaving a smooth flush surface.

Description: Available with #2 Phillips or #2 square recess drives. Pan head provides a flat bearing surface into solid material. Type 17 point is designed to smoothly penetrate wood without surface cracking.

Directions: Use a standard screwgun with a depth sensitive nose piece. Suggested screwgun specification for optimal performance – 4 amps minimum and 2500 RPM. The Pan head is fully seated when the head is flush with the work surface. Overdriving may result in failure of the fastener or stripout of the work surface. The fastener must penetrate beyond the metal a minimum of three thread pitches.

Certifications: All GRABBER® screw products are manufactured in facilities that are ISO 9001 certified. The fasteners comply with ASME B18.6.1. ©2012 GRABBER Construction Products, Inc.
