

Grabber Construction Products Tech Update

May 24, 2006

To: Whom It May Concern:
RE: LEED® Product Information

Kelly Jones
GRABBER Construction Products
5255 West 11000 North
Highland, Utah 84003

Dear Mr. Jones,

This letter is in response to your request for LEED information on your Aerosol Adhesive. The information below details the contribution of GRABBER Hang Tite Construction Adhesive to the LEED (Leadership in Energy and Environmental Design) Green Building Rating System® in accordance with LEED Version 2.1 for New Construction and Major Renovations.

The volatile organic content (VOC) of GRABBER Hang Tite Construction Adhesive meets the LEED requirements for low-emitting materials because it meets or exceeds the VOC content limits of South Coast Air Quality Management District Rule 1168 and the Bay Area Air Quality Management District Regulation 8, Rule 51. Both of these rules exempt aerosol adhesives and defer to the California Air Resources Board Consumer Product Regulation which states a maximum VOC content for Aerosol Mist Spray Adhesives at 65%. The VOC content of GRABBER Hang Tite is less than 65%, therefore it can assist in earning Indoor Environmental Quality Credit 4.1.

Please feel free to contact me if you need additional information.

Sincerely,
Jim McLarty
Manager of Regulatory Affairs and Plant Design
