## Pan Head Driller - Exterior

Heavy-Gauge Steel to Heavy-Gauge Steel

Description	Heavy-gauge steel to heavy-gauge steel connections, fixtures, backup plates, and door frames.	$ \begin{array}{c} \hline \\ \hline $
Specifications	Size   Gauge: #8 to #12 Length: 1/2 in. to 1 in. Head Type: Pan Head, Flat Pan Head, Low-Profile Flat Pan Head Recess Type: #2 Phillips, #2 LOX® Thread Type: Fine, Single Lead Finish: GrabberGard®, Stainless Steel	<b>Quality Assurance:</b> Grabber <sup>®</sup> fasteners are manufactured in ISO 9001 and ISO 14001 certified and approved factories. <b>LEED Reporting:</b> The post-consumer recycled steel content is 25%. <b>Compliance:</b> The fasteners comply with ASTM C1513 performance requirements. Specific fasteners are listed in ICC ESR- 1271; please check the report for listed item numbers.
Applications	<ul> <li>Heavy-gauge steel framing to heavy-gauge steel</li> <li>Pre-fabrication of heavy-gauge steel trusses</li> <li>Strapping to heavy-gauge steel</li> </ul>	<ul> <li>Fixtures to heavy-gauge steel</li> <li>Steel studs to track</li> <li>Steel studs to door frame jamb anchor clips</li> </ul>
Installation	<ul> <li>Use a standard screw gun with a depth-sensitive nose piece. Suggested screw gun specification for optimal performance: sizes #8 and #10, up to 2,500 RPM, size #12, up to 1,800 RPM.</li> <li>Because of significantly higher torque output, care and caution should be exercised when using an impact driver; other wise, screw failure or spin-out may occur.</li> </ul>	<ul> <li>In the pan head family of screws, all are fully seated when the head is flush with the work surface.</li> <li>The fastener must penetrate beyond the steel three full thread pitches.</li> <li>Overdriving may result in failure of the fastener.</li> </ul>
Features	<ul> <li>Pan head family of screws provides a flat bearing surface.</li> <li>Underhead serrations lock tight in steel-to-steel applications.</li> <li>Self-tapping drill point is designed for penetration into heavy-gauge steel.</li> </ul>	<ul> <li>Consistently formed extra-sharp drill point starts and drills easily into heavy-gauge steel.</li> <li>GrabberGard<sup>®</sup> exterior-grade coating provides additional protection against corrosion in most exterior applications.</li> </ul>

Standard Corrosion Test Results

Finish	Test	Standard/Protocol	Results		
<b>GrabberGard</b> ®	Salt Spray	ASTM B117	1,000 hrs., no red rust		

Note: Salt Spray Testing (SST) results are not intended to predict corrosion in real-world environments. The ASTM B117 standard for SST is recognized industry-wide as an effective tool for comparing different metals and different metal coatings in a tightly controlled, highly corrosive environment for specific periods of time. For more information about corrosion resistance, see the Grabber Guide to Corrosion Resistance for Fasteners.
